(Date)

13th January, 1948.

Buka trees are growing nearly all over Nikumaroro. But there is only one place where -uka trees do not grow, that is Very near to the place where the U.S Coastguard used to be. It is true that it is poisonous. -

Do Buka trees grow in the area near to where the boat lands? If not, you could plant nuts in that area -

-uka trees used to grow there (near the boat landing) but they have been cleaned off and the area planted. Only along side the beach is a suitable place for planting. And there is another suitable place near the Coast Guard -

He O.

Magistrate.
