

Itasca Radio Log

Position One, Smoothed Copy.

Aboard USCG *Itasca* there were positions for two operators in the ship's radio room. Normally, only one position was manned. On July 1, 1937, the operator at Position One was tasked with handling all of the ship's administrative radio traffic. At 1900 hours (7 p.m.) a radio watch was begun at Position Two specifically to communicate with the Earhart aircraft which was reportedly en route and expected to arrive sometime after dawn the next morning. At midnight on July 2, 1937 the Position One log was discontinued and Position Two took over all the radio duties.

Radio logs were typed in real-time as messages were sent and received. The original raw logs invariably contained strikeovers to correct mistakes, so the logs were routinely re-typed -- "smoothed" in nautical parlance -- to provide clean copies. This is the smoothed radio log for Position One. The original raw copy of the Position One log apparently no longer exists.
